

Docket No.: 4425-066

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of

Wen-Yuan CHANG

Serial No. 09/665,444

Filed: September 19, 2000

For: APPARATUS COMPENSATING A SCANNED OBJECT FOR OPTICAL  
CHARACTERISTICS ACCORDING TO LIGHT SOURCES OF DIFFERENT  
WAVELENGTHS

: ATTN: BOX ISSUE FEE

: Confirmation No. 5895

: Group Art Unit: 2622

: Allowed: July 16, 2003

: EXAMINER H. SAFAIPOUR

COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

Commissioner for Patents  
P.O. Box 1450  
Alexandria VA 22313-1450

Sir:

The following are comments on the Examiner's statement of reasons for allowance found in the Notice of Allowance mailed *July 16, 2003*.

The Examiner in the statement of reasons for allowance seemed to inadvertently omit several unique aspects of the claimed invention, namely:

1. An apparatus for scanning an object comprising:
  - an image capture module having at least a lens and a sensors array for capturing light after scanning said object;
  - a plurality of light sources with different wavelengths for projecting said object through said image capture module;
  - a first translation module connected with said lens and said sensors array of said image capture module, and said first translation module for changing a first location of said lens and a second location of said sensors array according to using different said light sources; and

B #4  
10/8/03  
SP

a power module connected with said first translation module and said light sources for supporting energy to said first translation module and said light sources, as recited in independent claim 1; *and*

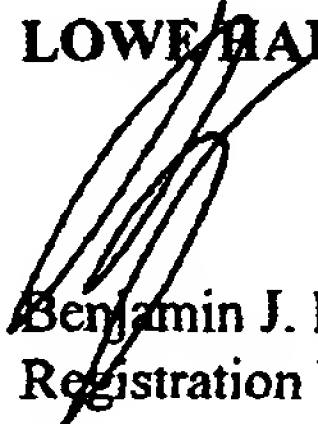

2. A method of scanning by a scanner comprising:  
using a plurality of light sources with different wavelengths;  
changing a first location of a lens according to said light source;

*and*

changing a second location of a sensors array according to said light source, as recited in independent claim 14.

Respectfully submitted,

**LOWE HAUPTMAN GILMAN & BERNER, LLP**
